

AUTOFLO Hygiene Handwash Station

Infra-red touch-free Handwashing systems where you need them
Food Manufacturing, Dairy & Processing Industries

DESIGN

Unique design requiring only a cold water feed and a 13 or 15 amp electrical supply.

INFRA RED

Turn water on and off with the wave of your hand.

VORTEX SPRAY HEAD

Makes handwashing easier and more efficient.

STRENGTH

Made from high quality impact resistant laminates combined with a scratch resistant surface. BSI tested for load and impact.

EFFICIENCY

Savings of up to 80% in running costs can be achieved.

TEMPERATURE

The unit provides a perfect handwashing temperature of 40-43°C.

AUTO SHUT-OFF

Shuts off after 20 seconds, so it cannot be left running.

EASY TO CLEAN

All areas are shaped to prevent water, dirt and germ traps.

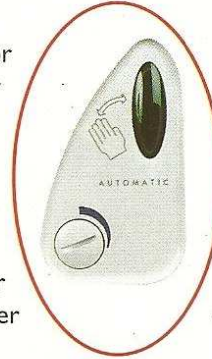

ELECTRICAL SUPPLY

Simply feed the 1.5mm cable through the cable gland and connect to the terminal block situated in the Autosensor. (Note: All electrical connections must be made in accordance with current regulations within the country of installation).

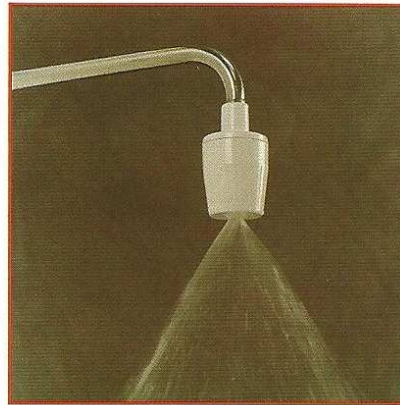

FLOW CONTROL

By turning the flow Control clockwise or anti-clockwise the flow of water dispensed via the vortex spray head can be varied. Once the unit has been set to the flow and temperature required, adjustments should only be necessary to compensate for the incoming variations in water temperature between the Summer and Winter months.

INFRA RED LED

Simply pass your hand in front and the unit switches on for a 20 second timed period. It can be stopped and started during the cycle the same way.

VORTEX SPRAY HEAD

A totally unique feature providing a rotating fine spray which concentrates the water over the hands, thereby cleaning thoroughly and much more efficiently. This action also eliminates scale build-up ensuring reliable handwashing time and time again.

WATER INLETS

Connections are very simple. UK models simply insert a 15mm copper pipe into the snap in connector. Overseas Models have a 1/2" BSP male thread which are designed to accept any 1/2" BSP female with the appropriate country's connection. All inlet water pipes are manufactured using approved materials and are pressure tested.

OPTIONAL EXTRAS

WASTE KIT

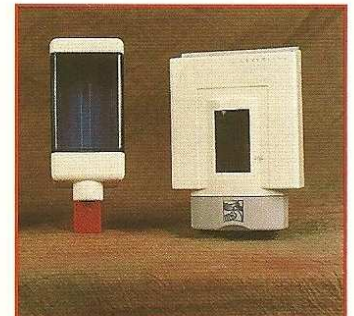

A waste kit can be used in remote areas where no connections to main drainage are available.

SOAP DISPENSERS

Two types of soap dispensers are available either 0.5 Ltr. bulk fill or 0.8 Ltr Cartridge dependant upon your particular requirements.

The soap dispensers come loose with the hygiene station and are attached to the unit by adhesive pads.

All units are guaranteed for two years by the manufacturer
